## Modelo Interno

#### **Dublin Core Metadata Element Set**

#### http://dublincore.org/documents/dces/

| Propriedade   | Tipo                                   | Descrição   |
|---------------|--|---|
| dccontributor | List <languagestring></languagestring> | An entity responsible for making contributions to the resource.   |
| dccoverage    | List <languagestring></languagestring> | The spatial or temporal topic of the resource, the spatial applicability of the resource, or the jurisdiction under which the resource is relevant. |
| dccreator     | List <languagestring></languagestring> | An entity primarily responsible for making the resource.  |
| dcdate        | List <languagestring></languagestring> | A point or period of time associated with an event in the lifecycle of the resource.  |
| dcdescription | List <languagestring></languagestring> | A point or period of time associated with an event in the lifecycle of the resource.  |
| dcformat      | List <languagestring></languagestring> | The file format, physical medium, or dimensions of the resource.  |
| dcindentifier | List <languagestring></languagestring> | An unambiguous reference to the resource within a given context.  |
| dclanguage    | List <languagestring></languagestring> | A language of the resource  |
| dcpublisher   | List <languagestring></languagestring> | An entity responsible for making the resource available.  |
| dcrelation    | List <languagestring></languagestring> | A related resource  |
| dcrights      | List <languagestring></languagestring> | Information about rights held   |

|           |  | in and over the resource.  |
|-----------|--|--|
| dcsource  | List <languagestring></languagestring> | A related resource from which the described resource is derived. |
| dcsubject | List <languagestring></languagestring> | The topic of the resource.                                       |
| dctitle   | List <languagestring></languagestring> | A name given to the resource.                                    |
| dctype    | List <languagestring></languagestring> | The nature or genre of the resource.                             |

#### **Dublin Core Metadata terms**

http://www.dublincore.org/documents/dcmi-terms

| termsabstract              | List <languagestring></languagestring> | A summary of the resource.   |
|----------------------------|--|--|
| termsaccessRights          | List <languagestring></languagestring> | Information about who can access the resource or an indication of its security status. |
| termsaccrualMethod         | List <languagestring></languagestring> | The method by which items are added to a collection.                                   |
| termsaccrualPeriodicity    | List <languagestring></languagestring> | The frequency with which items are added to a collection.                              |
| termsaccrualPolicy         | List <languagestring></languagestring> | The policy governing the addition of items to a collection.                            |
| termsalternative           | List <languagestring></languagestring> | An alternative name for the resource.  |
| termsaudience              | List <languagestring></languagestring> | A class of entity for whom the resource is intended or useful.                         |
| termsavailable             | List <languagestring></languagestring> | Date (often a range) that the resource became or will become available.                |
| termsbibliographicCitation | List <languagestring></languagestring> | A bibliographic reference for  |

|                          |  | the resource.  |
|--------------------------|--|--|
| termsconformsTo          | List <languagestring></languagestring> | An established standard to which the described resource conforms.  |
| termscreated             | List <languagestring></languagestring> | Date of creation of the resource.  |
| termsdateAccepted        | List <languagestring></languagestring> | Date of acceptance of the resource.  |
| termsdateCopyrighted     | List <languagestring></languagestring> | Date of copyright.   |
| termsdateSubmitted       | List <languagestring></languagestring> | Date of submission of the resource.  |
| termseducationLevel      | List <languagestring></languagestring> | A class of entity, defined in terms of progression through an educational or training context, for which the described resource is intended. |
| termsextent              | List <languagestring></languagestring> | The size or duration of the resource.  |
| termshasFormat           | List <languagestring></languagestring> | A related resource that is substantially the same as the pre-existing described resource, but in another format.                             |
| termshasPart             | List <languagestring></languagestring> | A related resource that is included either physically or logically in the described resource.  |
| termshasVersion          | List <languagestring></languagestring> | A related resource that is a version, edition, or adaptation of the described resource.  |
| termsinstructionalMethod | List <languagestring></languagestring> | A process, used to engender knowledge, attitudes and skills, that the described resource is designed to support.                             |
| termsisFormatOf          | List <languagestring></languagestring> | A related resource that is substantially the same as the described resource, but   |

|                     |  | in another format.  |
|---------------------|--|---|
| termsisPartOf       | List <languagestring></languagestring> | A related resource in which<br>the described resource is<br>physically or logically<br>included.            |
| termsisReferencedBy | List <languagestring></languagestring> | A related resource that references, cites, or otherwise points to the described resource.                   |
| termsisReplacedBy   | List <languagestring></languagestring> | A related resource that supplants, displaces, or supersedes the described resource.                         |
| termsisRequiredBy   | List <languagestring></languagestring> | A related resource that requires the described resource to support its function, delivery, or coherence.    |
| termsissued         | List <languagestring></languagestring> | Date of formal issuance (e.g., publication) of the resource.  |
| termsisVersionOf    | List <languagestring></languagestring> | A related resource of which the described resource is a version, edition, or adaptation.                    |
| termslicense        | List <languagestring></languagestring> | A legal document giving official permission to do something with the resource.                              |
| termsmediator       | List <languagestring></languagestring> | An entity that mediates access to the resource and for whom the resource is intended or useful.             |
| termsmedium         | List <languagestring></languagestring> | The material or physical carrier of the resource.   |
| termsmodified       | List <languagestring></languagestring> | Date on which the resource was changed.   |
| termsprovenance     | List <languagestring></languagestring> | A statement of any changes in ownership and custody of the resource since its creation that are significant |

|                      |  | for its authenticity, integrity, and interpretation.   |
|----------------------|--|--|
| termsreferences      | List <languagestring></languagestring> | A related resource that is referenced, cited, or otherwise pointed to by the described resource.               |
| termsreplaces        | List <languagestring></languagestring> | A related resource that is supplanted, displaced, or superseded by the described resource.                     |
| termsrequires        | List <languagestring></languagestring> | A related resource that is required by the described resource to support its function, delivery, or coherence. |
| termsrightsHolder    | List <languagestring></languagestring> | A person or organization owning or managing rights over the resource.  |
| termsspatial         | List <languagestring></languagestring> | Spatial characteristics of the resource.   |
| termstableOfContents | List <languagestring></languagestring> | A list of subunits of the resource.  |
| termstemporal        | List <languagestring></languagestring> | Temporal characteristics of the resource.  |
| termsvalid           | List <languagestring></languagestring> | Date (often a range) of validity of a resource.  |

## Propriedades Base

| sourceRepositorie | List <string></string> | Nome dos repositórios do qual os dados provêm                 |
|-------------------|------------------------|---|
| sourcePage        | List <string></string> | Páginas web do repositório para visualização da informação    |
| sourceData        | List <string></string> | Url para download da<br>directa dos dados dos<br>repositórios |

| images                          | List <string></string>                       | Urls para imagens relacionadas com o objeto.   |
|---------------------------------|--|--|
| IsCombinedResut                 | Boolean                                      | Indica que este objectos<br>result é resultado da união<br>de dois ou mais objectos<br>result. |
| createdIn                       | CreatedIn                                    | Informações sobre onde o objecto foi criado  |
| technique                       | List <languagestring></languagestring>       | Técnicas usadas para criar o objecto.  |
| locations                       | List <location></location>                   | Locais associados com este objecto.  |
| Agents                          | List <agent></agent>                         | Pessoas associadas ao objecto  |
| TimeSpans                       | List <timespan></timespan>                   | Intervalo de Tempo associado ao resultado.   |
| extraProperties                 | List <extraproperty></extraproperty>         | Propriedades do repositório que não têm associação directa a uma propriedade do modelo interno |
| sameLocationCoordenatesT<br>hat | List <relationlocations></relationlocations> | Relaçoes criadas<br>automaticamente<br>comparado as cordenadas<br>de diferentes objectos       |
| sameLocationNameThat            | List <relationfield></relationfield>         | Relaçoes criadas<br>automaticamente<br>comparado os nomes dos<br>locais de diferentes objectos |

#### CreatedIn

| Propriedade | Tipo                                   | Descrição                               |
|-------------|--|---|
| name        | List <languagestring></languagestring> | Nome do local onde foi criado o objecto |

| latitude  | List <float></float> | Latitude do local onde foi criado o objecto  |
|-----------|----------------------|--|
| longitude | List <float></float> | Longitude do local onde foi criado o objecto |

## Location

| Propriedade     | Tipo                                   | Descrição  |
|-----------------|--|--|
| Id              | int                                    | Id para indentificar o local.<br>O id é unico apenas para<br>cada resultado.             |
| name            | List <languagestring></languagestring> | Nome do local  |
| coordinates     | List <point></point>                   | Cordenadas do Local  |
| ExtraProperties | List <extraproperty></extraproperty>   | Propriedades do local que não têm associação directa a uma propriedade do modelo interno |

## Agent

| Propriedade     | Tipo                                   | Descrição   |
|-----------------|--|---|
| name            | List <languagestring></languagestring> | Nome do Agente  |
| dateOfDeath     | String                                 | Data do falecimento do<br>Agente  |
| dateOfBirth     | String                                 | Data de Nascimento do<br>Agente   |
| extraProperties | List <extraproperty></extraproperty>   | Propriedades do agente que não têm associação directa a uma propriedade do modelo interno |

#### relationLocations

| Propriedade            | Tipo   | Descrição  |
|------------------------|--------|--|
| idResult               | String | identificador do objecto alvo<br>com o qual este objecto tem<br>uma relação. |
| thisResultIdLocation   | int    | Id do location do objecto<br>que se relaciona com o<br>objecto alvo          |
| targetResultIdLocation | int    | Id do location do objecto alvo que se relaciona com o este objecto.          |

## relationField

| Propriedade    | Tipo                           | Descrição  |
|----------------|--------------------------------|--|
| targetResultId | String                         | identificador do objecto alvo<br>com o qual este objecto tem<br>uma relação. |
| valueField     | List <valuefield></valuefield> | campos e valores que se<br>relacionam com com o<br>objecto alvo.             |

#### **Point**

| Propriedade | Тіро  |
|-------------|-------|
| latitude    | float |

| longitude | float |
|-----------|-------|
|           |       |

#### valueField

| Propriedade | Tipo   | Descrição  |
|-------------|--------|--|
| fieldName   | String | identificador do objecto alvo<br>com o qual este objecto tem<br>uma relação. |
| fieldValue  | String | campos e valores que se relacionam com o objecto alvo.                       |

## LanguageString

| Propriedade | Tipo                   | Descrição                 |
|-------------|------------------------|---------------------------|
| Language    | String                 | Língua associada ao texto |
| Text        | List <string></string> | Texto                     |

## ExtraProperty

| Propriedade | Tipo                   | Descrição   |
|-------------|------------------------|---|
| Name        | String                 | Propriedade do repositório sem associação ao modelo interno |
| Value       | List <string></string> | Valores dessa propriedade                                   |

# TimeSpan

| Propriedade     | Tipo                                   | Descrição  |
|-----------------|--|--|
| Name            | List <languagestring></languagestring> | Nome associado ao intervalo de tempo.<br>Exemplo: século 17  |
| Begin           | DateTime                               | Data e hora de início  |
| End             | DateTime                               | Data e hora de fim   |
| extraProperties | List <extraproperty></extraproperty>   | Propriedades do TimeSpan<br>que não têm associação<br>directa a uma propriedade<br>do modelo interno |

## DateTime

| Propriedade | Тіро |
|-------------|------|
| Year        | Int  |
| Month       | Int  |
| Day         | Int  |
| Hour        | Int  |
| Minute      | Int  |
| Second      | Int  |
